This workshop is for librarians who want to learn how to use Scratch in their library or MakerSpace.

Scratch is a block based programming language for kids in 3rd grade and up. Scratch mixes creativity with critical thinking, problem solving, and mathematical skills in a fun and meaningful way.

This workshop will focus on the basics of using Scratch 3.0 and includes a demonstration of using hardware such as Makey Makey and Microbit with Scratch.

Register now to take the first step in your journey to becoming a resource for Scratch in your school.

Presented by Keri Haas, Technology Integration Specialist, Eastern Suffolk BOCES

Date: February 12, 2019
Time: 8:30 - 11:30 a.m.
Place: Suffolk Cooperative Library System, Training Room
